

Group Contribution Document

Group Project

Date: May 29, 2026

Group name: DE-II_5

Group members: Arnab Kumar Ghosh, Eric Buxton, Prodip Kumar Das, Rahul Bhat

Contributions

Arnab Kumar Ghosh: Provisioned VMs using Ansible, designed the system architecture, set up the CI/CD pipeline with GitHub hooks, implemented and trained the Neural Network model, and contributed to the report writing and also added the templates for the dashboard of frontend application.

Eric Buxton: Implemented and trained the Linear regression model for Github stargazer prediction, participated and was active in group meetings and presentation and contributed to the report.

Prodip Kumar Das: I contributed by writing the project report, creating the README.md file, and updating the DE2_Project3_Implementation_Guide.md file. I also participated in group meetings and the presentation. In addition, I reviewed the report, documentation, and repository files to identify and resolve inconsistencies between the implementation, architecture description, and project requirements.

Rahul Bhat: I wrote and implemented the github crawler. Further i also trained the SVR machine learning model. I also created the infrastructure to accomplish the scalability tests aswell as actually execute the scalability tests and procured the results and graphs related to such. Other than that i have actively participated in group meetings and presentation.
